

Transport Doors and Panels over the stairs alone easily

Staircase climber

This special transport and lifting roller makes it easy to transport doors, panels, windows and other extensive building elements over obstacles, e.g. staircases.

Advantages:

- Sturdy construction
- The handle can be extended, which increases the lever length and also the pulling force, which makes it much easier to transport tall architectural elements
- Low storage space requirements - collapsible

Construction:

- Adjustable handle in grid design
- The two 3-star wheels attached to the ball bearing-mounted main axle make it easy to roll the climber over any obstacles
- Casters at the front end make it easier to steer and guarantee stability
- The clamps on the handle and the bearing face provide a sturdy grip
- Powder coated

Art.-Nr.: 0115.00.000.101

Target group:

joineries, interior furniture, commerce, craftsmen, furniture retailers

Technical specifications:

- Dimensions when collapsed for transportation (L x W x H): 1,200 x 500 x 500 mm
