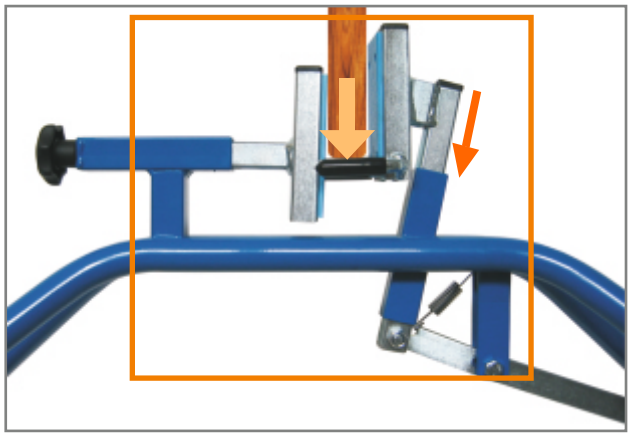
ZIEKER® INNOVATIONEN

Providing a secure grip for professional assembly.

Door jack



Advantages:

- The item being clamped is automatically kept securely in position by its own weight
- The clamp jaws are plastic-coated - this prevents damage to the clamped item
- Sturdy steel tube design

Construction:

- With a foot pedal release
- Clamping range can be set to a maximum of 90 mm using a star knob
- Powder coated (dark blue)

Product info:
The clamp jaws are pressed down by the weight of the item being clamped. The oblique angle of the guide makes the distance between the jaws of the clamp shorter and securely clamps the item (door, panel, window).

Artikelnummer: 0110.17.000.101

Technical specifications:

- Dimensions (L x W x H): 750 x 300 x 350 mm
- Empty weight: 4,1 kg
- Load capacity of up to 400 kg per door jack
